Interview Documentation:

[Interviews/meetings with individuals must be documented in the EIS Administrative Record.]

- Name(s): Calvin Hill, Pastor Methodist Church 845-8135 Cell
- Who they are and why we are talking to them: Land Owner, area west of Norman Tract, Willow Creek goes thru property.
- Date and time of interview: 1/25/2011 @ 4:25-5:10
- Interview Questions/What was discussed:
  - Does floodplain map correlate to observed flooding on your property or through the watershed? Yes
  - What is the location, extent, and effects of flooding to your property?
    - Structure flooding, molding, health issues In 2018, spring. water came as high as the spreader located about 20' SE of home
    - Access issues NO
    - economic and property losses NO
    - Erosion NO
    - etc. Ice jammed at culvert/cattle guard near highway
    - 2017 and 2018 worse years, Calvin has lived on site since 2013
  - What flood control structures/improvements might help alleviate flooding (if any) on your property or through the watershed? Irrigation channels, potential to assist with downstream flooding.
  - What environmental resources on your property or throughout the watershed do you see as needing consideration with the implementation of flood control facilities?
    - Wildlife beavers
    - Culturally significant plants
    - Cultural/historical sites old parsonage area
    - Farming/ranching areas - plans for irrigation, potential win-win
    - etc.
  - Other views/comments expressed
    - Plans to develop sobriety home on site. Low points on SE + SW corner of property, possible areas to divert water to willow creek. Not opposed to diverting water - goal is to have water for irrigation

Note: When the ice dam broke @ Calvins/Methodist land the Norman tract flooded within minutes. See Denise Sabois interview for more information.
